napoleon's seventy-eight maxims of war stand as testament to his military talents his cunning during skirmishes and army movements and his tactical prowess upon the battlefield are amply demonstrated the maxims vary in topic but tend to discuss principles of sound command and maximizing effectiveness of an army having famously overcome many superior forces thanks to a creative and daring use of tactics to divide and defeat enemy armies napoleon was in a position to advise future commanders knowing the exploits of generals such as julius caesar napoleon was also informed with historical knowledge the psychology of warfare and the importance of surprise and initiative are far from lost on napoleon bonaparte as the notes of the translator aptly demonstrate there are many historical examples of napoleon putting his principles to work in military maneuvers whether it be lessons in leadership as an inspiring force conduct in a siege and the deployment of cavalry or artillery it is clear that napoleon's words are grounded in his extensive experience of war we learn how sustaining control upon one's officers and troops with discipline are paramount the consequences of chaos in the ranks can be contagious and ruinous this translation of napoleon's maxims is by sir george charles d'aguiar who was himself an army officer serving with the british army as lieutenant governor of hong kong the second portion of this book consists of d'aguiar's interpretations and explanations of napoleon's ideals as a general for his part as a young man during the napoleonic wars d'aguiar held napoleon in high regard as a person of supreme resolve and great capacity

the elimination of opposing armed forces or by non military means such as propaganda economic sanctions and political isolation thus any resource of the human body and mind and all the moral and physical powers of a state might serve as means to achieve the set goal
